## Product Notification

### Release: Scandinavian Rates Data

As a result of the continued strategic investment in our broking and data businesses, TraditionDATA is happy to announce the addition of new Scandinavian rates dataset. The release of this data comes with the addition of a market leading team into our already established, and highly regarded, broking business in Scandinavian Swap products.

Initially, TraditionDATA will be producing vanilla interest rates swaps, IRS and treasury spreads and forward swaps across the SEK, NOK and DKK currencies. This will be followed by OIS, FRAs and basis swaps in the near future.

This offering is currently available direct from TraditionDATA. Over Bloomberg under TRUK<GO> and B-Pipe or via Refinitiv under the page <TRADSCANDI> and the Refinitiv enterprise product suite.

TraditionDATA provides consistent, high-quality financial market data that reflect real price interest in global OTC swaps markets, covering FX & Money Markets, Interest Rate Derivatives, Credit & Fixed Income, and Energy & Commodities. Data can be delivered directly from Tradition or from one of our distribution partners, which include, among others, Bloomberg, ICE, NEX and Refinitiv.
